

LITE CYCLES, INC.

REAL-TIME 3D (RT3D™) CAMERA AND TELESCOPE

CONFIGURABLE FOR USE AT
MULTIPLE WAVELENGTHS

LCI has developed an intensified large-format 3D camera. LCI's RT3D™ camera is capable of capturing high-resolution 3D imagery in real-time at video frame-rates. Features of the RT3D™ camera include the following:

- Integral rangefinder
- Large-aperture catadioptric telescope
- Configurable for high frame-rates
- Multi-gigabit fiber-optic data transfer
- Real-time 3D image processing
- Compact LIDAR control electronics package
